COPPERWORKS Announces \$32 Million Expansion in New Haven, IN, USA

SDI LaFarga COPPERWORKS is advancing a US\$32 million investment to expand its operations in New Haven, IN, USA, creating new jobs and reinforcing its long-term commitment to customers, team members and the continued growth of its northeast Indiana campus. The project marks a significant expansion of the company's manufacturing capabilities and overall footprint. **COPPERWORKS** has operated in New Haven since 2011, and the investment reflects sustained growth and increasing demand across its product lines. Plans include two new buildings, one for manufacturing and one for office space, along with new production equipment to enhance efficiency and output.

A key component of the investment is the installation of two new equipment lines including bus bar and copper shape production and expanded wire drawing capabilities, which will increase production capacity and product offerings. These enhancements will allow **COPPERWORKS** to deliver greater value to its existing customers while also expanding its ability to serve new markets. The added capacity strengthens the company's position as a reliable, domestic supplier of high-quality copper products.

The expansion is also expected to support workforce growth, with approximately 12 new full-time, skilled manufacturing positions, contributing to continued job growth in the region. These roles will support the company's ongoing efforts to invest not only in infrastructure, but in the people who power its operations.

"Broader domestic reshoring trends are creating meaningful opportunities for USA-based manufacturers to reinvest in their facilities," said **Jerry Evans**, President of **COPPERWORKS**. "As companies prioritize domestic supply chains, we are well-positioned to meet that demand through strategic investments like this."

Products from the expanded capabilities will be available across the company's Advantage, Elemental and 100% recycled content Infinity brands, offering customers a range of performance and sustainability-focused solutions. www.COPPERWORKS.com

Emerald Lake Capital Makes Equity Investment in W.E.C.S. & ECS

Emerald Lake Capital Management made an equity investment in **W.E.C.S. Electric Supply, Inc.** and **Electrical Cable Specialists, Inc. (ECS)**,  **WECS**

which have merged into a combined specialty distribution and cable-integration platform serving critical power and infrastructure markets. The combined platform will operate under the **WECS** name, and will provide customers with a broader range of cable, accessories and related services across new construction and installed-base maintenance industries.

Distributor Wire & Cable Opens Facility in Midland, TX, USA, to Serve the Permian Basin

Distributor Wire & Cable (DWC), Aurora, CO, USA, a specialty wire and cable master distributor, opened its newest facility in Midland, TX, USA, bringing local will-call and cut-to-length service to electrical distributors that serve in the Permian Basin area.

Until now, DWC's Permian Basin distributors were served out of Dallas, TX, USA, or Houston, TX, USA, adding a day or more to orders that need to move fast to win the job.

The new Midland facility closes that gap. Distributor partners in the area now get local will-call pickup and

same-day cut-to-length on core product lines, with the same no cut charge, no reel charge, no minimum terms DWC offers across its network.

The Midland wire and cable warehouse offers will-call inventory that includes aluminum, portable cord, instru-

mentation cable and tray cable. DWC's full catalog including category cable, medium voltage (5kV-35kV), fire alarm, sound/security and thermocouple wire, stays available to Midland-area distributors through DWC's broader distribution network and FastQuote customer portal along with 24/7 emergency service. www.distributorwire.com

Sanbor Corporation adds Jason Kendrick to sales team

Sanbor Corporation welcomed Jason Kendrick to the sales team as a Regional Sales Manager. Kendrick brings a passion for building strong relationships, solving customer challenges and helping manufacturers succeed.

Jason Kendrick's experience and enthusiasm align ideally with Sanbor Corporation's commitment to delivering quality, innovation and exceptional service.

Hengtong to supply Earth Power Cable to Goyder

Hengtong Cable Australia (HCA), will be supplying about 9 km of 33 kV and 23 km

of earth power cable to Goyder Battery, a standalone big battery located within the Goyder South project area. Goyder Battery will be constructed across at least two stages, with the first stage being 227 MW/907 MWh. Remaining stages are under development. Goyder Battery is located adjacent to ElectraNet's Bunday Substation and its construction commenced in early 2026.

Philatron Expands Manufacturing Capabilities with New High-Heat Silicone Wire & Cable Making Line

Los Angeles, CA, USA-based **Philatron Wire and Cable**, a leader in custom cable manufacturing, announced the installation of its new state-of-the-art high-heat silicone wire and cable production line. This expansion includes the capability to manufacture specialized silicone tubing. The new line directly supports the rigorous demands of military and industrial sectors requiring extreme thermal and environmental resistance. Modern military and industrial applications operate under severe conditions. Traditional insulation materials often fail when exposed to extreme temperatures or constant flexing. Philatron's new silicone production line delivers a robust solution and provides wiring and tubing that maintain structural integrity and electrical performance where other materials degrade. Silicone-insulated wires and cables

provide distinct technical advantages for critical infrastructure, heavy machinery and defense systems including extreme temperature resilience, high flexibility, chemical and environmental resistance, superior flame retardancy, high dielectric strength and silicone tubing utility. The silicone extrusion line reinforces Philatron's commitment to vertical integration and strict quality control. Producing silicone wire, cable and tubing entirely in-house ensures full traceability and adherence to strict military standards and industrial certifications.

www.Philatron.com

this context, Prysmian announces the launch of a new post-graduate Master Program, "Cable Systems for the Energy Transition", focused on power transmission cable systems and developed in collaboration with the University of Palermo, Italy. The initiative addresses the growing difficulty in finding talent with advanced technical skills in the electrotechnical field, particularly in cable systems. This shortage affects the entire energy value chain, involving both grid operators and technology providers, making investment in human capital development more urgent than ever. The one-year program is designed as a highly professional course, developed in close alignment with industry needs and based

on a comprehensive end-to-end approach. Participants will gain expertise across the entire lifecycle of cable systems—from design and manufacturing to installation, operation, and maintenance—with the goal of enabling fast and effective entry into the job market.

Taihan Wins Power Grid Project in Australia

Taihan won a turnkey project to build a power grid for an AI data center (AIDC) ordered by **Transgrid**, Australia's largest electricity transmission network operator. The contract is valued at approximately KRW 45 billion. The project is designed to provide a stable, large-scale power supply to an AIDC currently under construction in Australia. Under the contract, Taihan will build a 330 kV-class extra-high-voltage cable system on a turnkey basis.

Southwire: Executive Leadership Changes

Southwire welcomed three new executives and announced expanded responsibilities for two current members of the executive team.

Nick Brazis will now serve as Southwire's Executive Vice President (EVP) and Chief Financial Officer (CFO). Brazis most recently worked at **Pentair, Inc.**

Elizabeth Spence joins the team as Executive Vice President (EVP) and Chief People and Culture Officer. She most recently served as EVP, Chief Human Resources Officer at **Graphic Packaging**.

Jeff Fleece now serves as Southwire Company's Senior Vice President (SVP) as well as the company's

Chief Digital Information Officer.

Christy Wright will expand her responsibilities to now serve as Southwire's Chief Supply Chain and Business Systems Officer.

Wright, who joined Southwire in 2007, has served as EVP, Chief Supply Chain Officer and Interim CFO since February.

Burt Fealing will expand his role, adding leadership of Southwire's Operational Sustainability, enterprise Environmental, Health and Safety (EHS) and Community Affairs teams.

With the appointment of these new leaders, Southwire continues its efforts to create long-term value for its stakeholders. **Southwire Company LLC** is North America's leading wire and cable company. Additional information on these executive appointments is available at: www.southwire.com

defect in the heart, whereby various cardiovascular catheters are introduced. The LightningWire system combines a novel electrosurgical guidewire with a dedicated activation cable to simplify procedures using preferred transseptal introducers and existing electrosurgical generators. The LightningWire's proprietary insulation design optimizes electrosurgical performance and mechanical properties along the length of the wire. Robust distal insulation allows transseptal puncture at low power settings. Despite its 0.032" labeled diameter that facilitates broad compatibility with various transseptal devices, the LightningWire is stiffer than the market-leading 0.035" guidewire to

support efficient transseptal delivery of therapy devices.

CDA Welcomes Alan Wire Company as New Member

The **Copper Development Association (CDA)**, in McLean, VA, USA, announced **Alan Wire Company** as its newest member. For 50 years, Alan Wire has been growing its product offerings to provide quality copper solutions that power industrial facilities and deliver electricity throughout commercial and residential buildings.

www.copper.org

the first quarter of 2026.

Revenue and operating profit increased by 19.4% and 27.2%, respectively, compared to the same period last year (KRW 639.3 billion and KRW 21.9 billion). Both figures hit record highs for the first quarter, continuing the company's trajectory of simultaneous external growth and profitability improvement. These record results are driven by a surge in exports fueled by the expansion of USA AI data centers, and accelerating growth of USA production subsidiary, LSCUS, which is ramping up its supply of busducts for AI data centers built by big tech companies in the USA. The company expects busduct revenue to rise significantly, jumping from tens of billions of won last year to hundreds of billions of won this year.

Exports from the headquarters to the USA are also rising rapidly. Exports of cables for AI data centers and solar power grids are projected to more than double, growing from approximately KRW 100 billion last year to KRW 200 billion this year. Established as Korea's first cable company funded entirely by domestic private capital, Gaon Cable is rapidly transitioning its business structure from a domestic focus into a global export enterprise centered on the USA.

CBSA Makes Dumping & Subsidizing Determinations on Unarmoured Building Cables from China

The **Canada Border Services Agency (CBSA)**, pursuant to subsection 38(1) of the Special Import Measures Act (SIMA), made preliminary determinations of dumping and subsidizing respecting unarmoured building cables (UBC) originating in or exported from the People's Republic of China.

The subject goods are usually imported under tariff classification numbers: 8544.49.00.19 and 8544.49.00.90. However, the subject goods may also be imported under the following tariff classification numbers, in particular if they are imported as conductors to be further processed into UBC: 7408.11.10.00, 7408.19.00.10,

7605.29.00.00 and 7614.90.00.00. The above-listed tariff classification numbers cover both subject and non-subject goods and are for convenience of reference only. Refer to the product definition for the authoritative details regarding the subject goods.

Provisional duties will now be payable on the subject goods that are released from the CBSA on or after July 29, 2026. Additional information about these investigations is contained in a Statement of Reasons, which will be available within 15 days. For more information, please consult the Guide for Self-assessing SIMA duties at: www.cbsa-asfc.gc.ca

experiences, but they both have lots to share with Wireco. As the company continues to develop, it is important to bring in people who are ready to learn, support the team and contribute to the firm's future.

Obituaries

James Rodney Anixter "The Pink Hat Guy"

James Rodney "Jim" Anixter, a long-time wire and cable industry leader who served as Executive Vice President of **Anixter Brothers** before founding **AZ Wire & Cable**, died June 30, 2026 at the age of 81. Anixter served as Executive Vice President of Anixter Brothers for 22 years before founding AZ Wire & Cable in 1988. He built the company into a family business based on integrity, hard work and lasting relationships. During his career, Anixter earned the respect of colleagues throughout the electrical, wire and cable industries.

Beyond his business career, Jim Anixter was widely known to millions of baseball fans as the Chicago Cubs' "Pink Hat Guy." A Cubs season ticket holder for 60 years, he purchased his first season tickets in 1966 and beginning in 1967, became a familiar presence in the front-row seats behind home plate at Wrigley Field. His bright pink baseball cap became one of the most recognizable sights during Cubs broadcasts. The tradition began as a playful promise to his wife, **Lesley Anixter**, that she could always spot him on television. Following the 1990 All-Star Game, the pink hat became a permanent part of his identity. A gifted athlete and passionate sports fan, Anixter was also inducted into the Illinois Softball Hall of Fame.

Anixter is survived by Lesley, his wife and best friend of 55 years; children **Darren (Michelle) Anixter**, **Todd (Jessica) Anixter**, **Eric Anixter (Hannah Rosenfeld, fiancée)** and **Courtney Anixter (AJ Golding)**; and grandchildren **Evan (Katie)**, **Grant**, **Austin**, **Tyler** and **Jayden Anixter** and **Watts, Stiles** and **Ronette Golding**.

Memorial donations may be made to the **American Cancer Society** and **Jewish United Fund Chicago (JUF)**.

Darren, Todd and Eric Anixter currently work at AZ Wire and Cable located in Northbrook, IL, USA, as Executive Vice Presidents. AZ Wire & Cable is a leading master distributor for industrial, commercial and specialty wire and cable. AZ supplies the electrical distribution channel and associated markets. The company operates from nine regional

locations across the USA.

Robert Mailloux 1952 - 2026

Robert Roland "Bob" Mailloux, a longtime wire and cable industry sales professional and member of the **Wire Association International (WAI)**, died July 19, 2026, in Holyoke, MA, USA. Born July 13, 1952, in Holyoke, MA, USA, Mailloux graduated from Precious Blood High School before serving in the U.S. Marine Corps. Following his military service, he earned a degree from the **University of Massachusetts**.

Mailloux spent more than 40 years in sales in the wire and cable industry, where he developed business relationships that grew into lifelong friendships. His career included extensive travel throughout Europe and Mexico, and he remained active in the industry well beyond traditional retirement age. Most recently, he represented **J. J. Lowe Associates**. A longtime member of the Wire Association International, Mailloux maintained a strong interest in new technological developments and valued the professional relationships he built throughout the global wire and cable industry.

Mailloux enjoyed golf, skiing, baseball and basketball. He and his wife, **Debbie**, were regulars at Gwinnett Strippers baseball games near their home in Lawrenceville, GA, USA. He was also an avid golfer, playing regularly with friends while continuing to work on improving his game. Mailloux was known for his outgoing personality and ability to connect with people. Whether traveling for business or spending time with family and friends, he enjoyed learning about others and building lasting relationships. He is survived by his wife of 50 years, **Debra (Geoffrey) Mailloux**; children, **Melissa Mailloux**, **Andrew Mailloux** and **Katie Armsby** and husband **Gardner Armsby**; grandchildren **Penelope** and **Jack Armsby**; siblings **Ronald Mailloux**, **Margaret Colarusso** and **Mark Mailloux** and wife **Joan**. Memorial contributions may be made to **Habitat for Humanity** or **St. Jude Children's Research Hospital**. Bob's full obituary can be found at:

WHMA Welcomes Four New Board Members

David Bergman, Exec. Dir. of the **Wire Harness Manufacturers Association (WHMA)**, Bannockburn, IL, USA, announced the appointment of four new members to the WHMA Board of Directors. They are **Bob Bennish**, Vice President of OEM Distribution, **Southwire**; **Arik Vrobel**, Founder, **Cableteque**; **Bob White**, Project Development Manager, **Kirby Risk Service Center**; and **Cameron Haring**, President & Owner, **DECA Manufacturing Inc.**

The new WHMA Directors bring expertise in manufacturing, distribution, innovation and customer engagement that will help guide the association as it continues to support the global wiring harness industry.

"For over three decades, WHMA has been shaped by leaders who choose to serve—not because they have to, but because they believe in strengthening our industry and our community," Bergman said. "On behalf of our members, I want to thank Bob, Arik, Bob and Cameron for accepting this responsibility." WHMA is a non-profit dedicated to supporting wire harness manufacturers and stakeholders.

Sumitomo Electric & Van Oord sign agreement with SSEN Transmission

Sumitomo Electric Industries, Ltd., together with its project partner, Van Oord Offshore Wind UK Ltd., recently signed an HVDC Framework Agreement with SSEN Transmission, agreeing to proceed with initial design and engineering works for the proposed 525 kV Shetland 2 HVDC link between Shetland and the Scottish mainland.

The strategic partnership results in the engineering, supply and installation of HVDC cable projects including the Shetland 2 link.

Cable manufacturing is expected to commence in 2Q 2027 at Sumitomo Electric's state-of-the-art submarine cable manufacturing facility at Port of Nigg, Scotland.

Since the company's founding in 1897, Sumitomo Electric Industries, Ltd., has continued to innovate, grow and take on technical challenges in the ever-evolving wire and cable industry.

Anna Tanganelli to Chief Financial Officer at Prysmian

Prysmian will appoint Anna Tanganelli as its new Chief Financial Officer (CFO). She will replace Pier Francesco Facchini, who will leave the company at the end of 2026 to explore new opportunities.

Tanganelli will join Prysmian on November 2, 2026, from Iveco Group, where she has been Chief Finance & IT Officer since December 2023. With over 25 years in corporate finance and business development, Tanganelli has worked across the USA and Europe in roles for FCA (now Stellantis), CNH Industrial, Magneti Marelli (now Marelli Group) and the Italian multi-utility company Iren before joining Iveco Group. She is currently also a Director of filter solutions manufacturer GVS SpA.

EVENTS & OPPORTUNITIES

NPE2027 West Hall

Sells Out; Sales Reach 87%

NPE2027: The Plastics Show®, produced by the **Plastics Industry Association (PLASTICS)**, continues to build momentum, with West Hall exhibit space now completely sold out. The milestone brings total floor space sold to 87% and includes commitments from more than 300 new exhibiting companies. Taking place May 3 to 7, 2027, at the **Orange County Convention Center** in Orlando, FL, USA, *NPE2027* will welcome over 51,000 attendees and 2200 exhibitors from some 130 countries. The triennial event will showcase technologies, equipment, materials and services spanning the plastics value chain including recycling and sustainability, packaging, automotive, medical, consumer products, building and construction and manufacturing. Companies that have not yet secured exhibit space can apply for remaining opportunities in the South Hall including space within five Technology Zones and the Tangerine Ballroom, which will feature the new Sustainability Park, an immersive destination spotlighting

real-world solutions shaping the future of sustainable plastics.
